1300 BOULEVARD LAURIER — QUÉBEC

JACQUES LA ROCHE PRÉSIDENT & GÉRANT-GÉNÉRAL

Quebec, January 23rd, 1960

Mr. S.R. Morss,
#3, Bradford,
Mass., U.S.A.

Dear Sir:

Your letter has been transferred to me, yesterday, and I was really glad to know that our station has been heard at your place, in Bradford.

For your information, we operate on a frequency of 1060 Kc/s, with a radiating power of 5,000 watts. Our transmitter is a Gates BC-5P-2.

Your report, according to our program department, is correct, and you sure did not get mixed with other stations. It is interesting however to see how far a 5,000 watt station can reach. Naturally, our radiation pattern is directional, but specially directed toward north-east. That is why, even if you are fairly far from us, and out of our direction, it is interesting to have your report.

We hope that you can get our signal quite often, and that you listen to it. Unfortunately, we do not have english programs, but our main specialty is music.

Thanking you again for your report,
I remain,

Yours truly,

G. St-Pierre,
Station engineer.
